Unity, Git, OpenGL, Blender, FMOD

Education:

B.Sc. Games Engineering

Julius-Maximilians-Universität Würzburg

since 10.2020

Secondary Education

École européenne de Bruxelles III

09.2008 – 07.2020

Projects:

XR Disaster Management

The project includes a simulator developed in Unity with OpenXR as well as a WebXR application created using Three.js. Both applications are designed to assist civilians and rescue personnel in disaster situations by providing training and simulation scenarios.

Gravity Gauntlet

Level Design Lead for the puzzle platformer *Gravity Gauntlet*, where I led a five-member team over two semesters. The game was recently showcased at Gamescom and GG Bavaria.
